Roll no: 241501087 Phone: 9843749339

Branch: REC

Department: I AIML AD

Batch: 2028

Degree: B.E - AI & ML

NeoColab_REC_CS23231_DATA STRUCTURES

REC_DS using C_Week 3_MCQ_Updated

Attempt : 1 Total Mark : 20 Marks Obtained : 19

Section 1: MCQ

1. What will be the output of the following code?

```
#include <stdio.h>
#define MAX_SIZE 5
int stack[MAX_SIZE];
int top = -1;
void display() {
   if (top == -1) {
      printf("Stack is empty\n");
   } else {
      printf("Stack elements: ");
      for (int i = top; i >= 0; i--) {
            printf("%d ", stack[i]);
      }
      printf("\n");
   }
}
```

```
void push(int value) {
  if (top == MAX_SIZE - 1) {
    printf("Stack Overflow\n");
  } else {
    stack[++top] = value;
  }
int main() {
  display();
  push(10);
  push(20);
  push(30);
display();
  push(40);
  push(50);
  push(60);
  display();
  return 0;
}
```

Answer

Stack is emptyStack elements: 10 20 30Stack elements: 30 20 10Stack elements: 60 50 40 30 20

Status: Wrong Marks: 0/1

2. When you push an element onto a linked list-based stack, where does the new element get added?

Answer

At the beginning of the list

Status: Correct Marks: 1/1

3. What is the primary advantage of using an array-based stack with a fixed size?

Efficient memory usage

Status: Correct Marks: 1/1

4. What will be the output of the following code?

```
#include <stdio.h>
 #define MAX_SIZE 5
 int stack[MAX_SIZE];
 int top = -1;
 int isEmpty() {
return (top == -1);
 int isFull() {
   return (top == MAX_SIZE - 1);
 void push(int item) {
   if (isFull())
      printf("Stack Overflow\n");
   else
      stack[++top] = item;
 int main() {
   printf("%d\n", isEmpty(
   push(10);
   push(20);
   push(30);
   printf("%d\n", isFull());
   return 0;
 Answer
 10
```

Status: Correct

5. Which of the following Applications may use a Stack?

Marks: 1/1

Answer

All of the mentioned options

Status: Correct Marks: 1/1

6. In an array-based stack, which of the following operations can result in a Stack underflow?

Answer

Popping an element from an empty stack

Status: Correct Marks: 1/1

7. The user performs the following operations on the stack of size 5 then at the end of the last operation, the total number of elements present in the stack is

```
push(1);
pop();
push(2);
push(3);
pop();
push(4);
pop();
pop();
push(5);

Answer
```

1

Status: Correct Marks: 1/1

8. What will be the output of the following code?

```
#include <stdio.h>
#define MAX_SIZE 5
void push(int* stack, int* top, int item) {
```

```
24,150,1081
                                                                             24,150,1081
      if (*top == MAX_SIZE - 1) {
        printf("Stack Overflow\n");
        return;
      stack[++(*top)] = item;
   int pop(int* stack, int* top) {
      if (*top == -1) {
        printf("Stack Underflow\n");
        return -1;
      }
      return stack[(*top)--];
                                                                             247507087
int main() {
      int stack[MAX_SIZE];
      int top = -1;
      push(stack, &top, 10);
      push(stack, &top, 20);
      push(stack, &top, 30);
      printf("%d\n", pop(stack, &top));
      printf("%d\n", pop(stack, &top));
      printf("%d\n", pop(stack, &top));
      printf("%d\n", pop(stack, &top));
      return 0;
   Answer
   302010Stack Underflow-1
                                                                        Marks: 1/1
   Status: Correct
```

9. Which of the following operations allows you to examine the top element of a stack without removing it?

Answer

Peek

Status: Correct Marks: 1/1

10. Here is an Infix Expression: 4+3*(6*3-12). Convert the expression from Infix to Postfix notation. The maximum number of symbols that will appear on the stack AT ONE TIME during the conversion of this expression?

Answer

4

Status: Correct Marks: 1/1

11. The result after evaluating the postfix expression 10 5 + 60 6 / * 8 - is

Answer

142

Status: Correct Marks: 1/1

12. What is the value of the postfix expression 6 3 2 4 + - *?

Answer

-18

Status: Correct Marks: 1/1

13. A user performs the following operations on stack of size 5 then which of the following is correct statement for Stack?

```
push(1);
pop();
push(2);
push(3);
pop();
push(2);
pop();
pop();
pop();
push(4);
pop();
pop();
```

18. What is the advantage of using a linked list over an array for implementing a stack?

Answer

Linked lists can dynamically resize

Status: Correct Marks: 1/1

19. Consider a linked list implementation of stack data structure with three operations:

push(value): Pushes an element value onto the stack.pop(): Pops the top element from the stack.top(): Returns the item stored at the top of the stack.

Given the following sequence of operations:

push(10);pop();push(5);top();

What will be the result of the stack after performing these operations?

Answer

The top element in the stack is 5

Status: Correct Marks: 1/1

20. Consider the linked list implementation of a stack.

Which of the following nodes is considered as Top of the stack?

Answer

First node

Status: Correct Marks: 1/1
